

Decorative Glass for Windows & Doors

Leaded glass

Supaseal Glass manufactures a comprehensive range of designs to enhance any feature window, door or conservatory. Bespoke designs can also be created across all finishes.

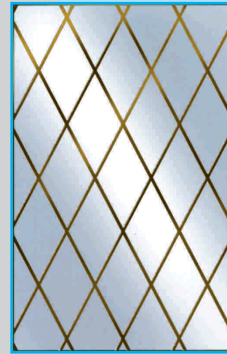

Leaded windows can be manufactured in a number of off-the-shelf designs and finishes. Clients can choose from a traditional lead, platinum or gold finish. The leading can be completed in a variety of widths - 3mm, 4.5mm; 6mm, 9mm or 12mm.

Bespoke leaded designs also available. Customers own leaded window designs can be recreated. Please contact Supaseal Glass direct to discuss any bespoke projects.

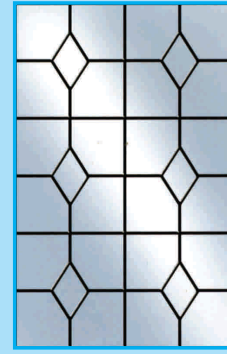

Also available Filmed glass

Give your windows a contemporary look using filmed glass. The vinyl - either patterned or simply frosted, is cut to your exact measurements and applied to the internal panel of the window frame.

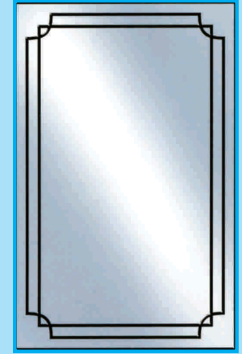

Filmed glass is a cost-effective way of providing some privacy to glass. It can be used solely for decorative purposes too - allow clients to get creative and personalise their windows and doors.
